

Thoi Thanh Vuong

Frontend Developer Intern

📍 Ho Chi Minh City, Vietnam ✉ Thanhvuong0419@gmail.com ☎ 0377658957
🌐 github.com/ThoiThanhVuong

Objective

Final-year Information Systems student seeking a Frontend Developer Intern position to apply my knowledge of React, TypeScript, and modern web development. Interested in building responsive user interfaces, integrating APIs, and improving user experience through real-world projects while continuously learning from experienced developers.

Education

Saigon University

Bachelor of Information Systems

GPA: 3.21 / 4.0

Ho Chi Minh City, Vietnam

2022 – 2026

Skills

Programming Languages: JavaScript, TypeScript

Frontend Development: React.js, Next.js, HTML, CSS, Tailwind CSS

API Integration: RESTful APIs, Axios, Fetch API

Responsive Design: Flexbox, CSS Grid, Media Queries

Tools: Git, GitHub, Postman, Figma (Basic)

Core Concepts: Component-Based Development, DOM Manipulation, State Management, Debugging

Soft Skills: Teamwork, Communication, Problem-solving, Self-learning

Languages: English (Intermediate)

Projects

1. Pocket Mini System (ERP Lite)

Individual Project | Full-stack Developer

A lightweight ERP system supporting inventory, human resource, and financial management operations.

Timeline: Feb 2026 – Apr 2026

Technologies: NestJS, Next.js, PostgreSQL, TypeScript, Docker

- Developed backend APIs using NestJS and TypeScript to support inventory, employee, and financial management modules.
- Implemented authentication and role-based access control using JWT for secure access to system resources.
- Designed and managed PostgreSQL databases with TypeORM, including entity relationships and data validation.
- Built responsive user interfaces using Next.js and Tailwind CSS, integrating frontend components with backend APIs.
- Integrated AI-powered assistant features to support information retrieval and user interaction within the system.
- Performed testing, debugging, and API validation to improve application stability and user experience.

2. Digital Signature System

Team size: 4 | Backend Developer

A secure platform for managing and verifying digital documents with authentication and document lifecycle management.

Timeline: Oct 2025 – Nov 2025

Technologies: Node.js, Express.js, PostgreSQL, TypeORM, JWT, Docker

- Developed RESTful APIs for document signing, verification, and management using Node.js and Express.js.
- Implemented authentication and authorization features using JWT and OTP verification to secure user access.
- Designed and maintained relational database schemas using PostgreSQL and TypeORM.
- Developed file upload and document processing functionalities for managing digital documents.
- Built scheduled background jobs using node-cron for document expiration and notification handling.
- Collaborated with team members through Git and GitHub, participated in code reviews, debugging, and feature integration.
